Clean Concrete Technologies

Dan Gotta
Wood Rodgers

Greg Guecia
BASF Admixtures

Dick Moore
SW Concrete Paving Assoc.

Jim Pickett
Grace Construction Products

Paulette Salisbury
CNCA

Doug Yeggy
Headwaters Resources

Colleagues:

The attached Admixture Matrix was developed by members of the Sierra Nevada Concrete Association Technical Committee, BASF Admixtures, Euclid Chemical, and Grace Construction Products representatives. The purpose of the matrix was to provide those involved in the concrete associated industries in Northern Nevada and California a reference guide with respect to the common concrete admixtures utilized in our area. The Matrix is not a complete list of all admixtures and for additional technical advice please contact the local admixture representatives outlined below:

BASF (Masterbuilders)
Ronald.weber@basf.com
775-223-9899

Ron Weber

Grace Construction Products
Jim.b.pickett@grace.com
510-773-9442

Jim Pickett

Euclid Chemical
BCoulson@euclidchemical.com
559-903-3111

Brent Coulson

In addition to the matrix presented on the other side of this flyer, the SNCA Technical Committee, in conjunction with the admixture industry, has developed a short power point presentation on the types and uses of the various admixtures. Please contact an admixture representative listed above or a SNCA member for the presentation or additional information.

Respectively,

Dan Gotta
SNCA Technical Committee
Co-Chairman
dgotta@woodrodgers.com

Keith Compbel
SNCA Technical Committee
Co-Chairman
keith.compbel@cemex.com
